DAYLIGHT AERIAL

TWILIGHT CONVERSION

# ONE PROPERTY.
# MORE THAN ONE WAY TO SEE IT.

Aerial photography. Twilight conversion. A different way to stop the scroll.

# ONE ROOM. THREE APPROACHES TO LIGHT.

The room does not change. The way light describes it does.

**OPEN + BALANCED**

Clean, bright and immediately readable.

**CONTROLLED + DIMENSIONAL**

Greater depth, separation and material definition.

**DIRECTIONAL + ATMOSPHERIC**

Light becomes part of the experience of the room.

## Different properties ask for different things.

The approach should follow the property - not the other way around.

# ATMOSPHERE WITHOUT ANOTHER NIGHT ON SITE.

A selected daytime interior can become another expression of the property - warmer, moodier and built to hold attention.

DAYLIGHT

TWILIGHT CONVERSION

# OUTDOOR LIVING CHANGES AFTER THE LIGHT DOES.

The architecture stays the same. The invitation changes.

**DAYLIGHT**

**TWILIGHT**

Another reason to see the same property differently.

# THE DIFFERENCE ISN'T SIMPLY HOW MUCH YOU SEE. IT'S HOW THE SPACE FEELS WHEN YOU SEE IT.
